Honors 1000: Productive Data Manipulation in Python and SQL
Mondays 9.30 to 10.20, Room 223, 100 Auburn Avenue

Fall 2018

Course Syllabus

Instructor

Raj Sunderraman, Professor of Computer Science (raj@gsu.edu)
Office: Room 626, 1 Park Place
Office Hours: 11 to Noon on Mondays; or by appointment (send me an email)

Course Description

An introduction to the basics of creating and maintaining data and generating reports from data using computer programming and relational databases. Students will learn how to write code in Python and SQL to perform data manipulation tasks to increase productivity. Basics of Data Science practices and approaches will be covered.

Learning Outcomes

1. The student will be able to create and maintain a relational database in MySQL. They will also be able to write SQL queries to extract relevant data from the database and generate reports.
2. The student will be able to write short Python programs to read data from a variety of formats, perform calculations and generate output. The student will also be able to compute various statistical measures, aggregations, and summaries of data.

Prerequisite

None

Textbooks and Course Materials

There will be no required textbook. We will use the following online tutorials and tools from the Web:

1. https://www.learnpython.org/
Schedule

Weeks 1-5 (Relational Databases and SQL)

- Relational Database Concepts
- SQL – Data Definition (create table/drop table)
- SQL – Data Manipulation (insert/delete/update)
- SQL – Querying
- MySQL
- 2 assignments

Weeks 6-10 (Python)

- Basics – Literals, Variables, Expressions, Assignment Statement
- Conditional Statement, For Loop
- Functions
- BeautifulSoup (HTML/XML Scraper Library)
- 2 programming assignments

Weeks 11-14 (Projects and Presentations)

- Groups of 2-4

Participate in the Life of the Honors College Attend co-curricular programs offered in the Honors College, for example our Lunch and Learn, Dine and Discover, and Research Essentials series, as well as guest speakers and co-sponsor events. Submit a short one or two paragraph summaries of what you learned in at least 3 events.

Grading

- 4 programming assignments: 50 points
- Project (groups of 2 to 4): 30 points
- Attendance/Participation: 20 points (10 for attendance and 10 for Summaries)

S Grade: >= 80
U Grade: < 80
